The Strategic Significance of the Atlantic Basin and Pan-Atlanticism for the Southern Atlantic

The strategic significance of the southern Atlantic is growing, driven by two underlying dynamics. Firstly, we have seen the geostrategic capabilities of the southern Atlantic states and their inhabitants strengthen and the value of their strategic assets rise, despite lingering internal vulnerabilities and frequent instability, often caused by the northern Atlantic and, on occasion, Eurasia. Secondly, the way in which the southern Atlantic states are pursuing and exploiting the potential of their growing autonomy is of great strategic concern for both northern Atlantic and Eurasian powers, as the international system is being reconfigured into something beyond uni-polarity. Furthermore, if the southern Atlantic states were to adopt a realistic perspective on the Atlantic Basin, they could easily begin to view 'pan-Atlantic cooperation' in certain strategic and transnational spheres, as proposed by the Partnership for Atlantic Cooperation (see Policy Brief One), as in their own best national and regional interests.
