### **Un difícil camino para recorrer**

Los argentinos tenemos la enorme suerte de contar con un país con grandes riquezas potenciales, tanto naturales como humanas. Pero, si este potencial no es acompañado por políticas de desarrollo compatibles con la evolución del mundo actual, seguiremos perdiendo oportunidades. Históricamente, nos hemos caracterizado por políticas exteriores cambiantes, con los consiguientes efectos negativos, sobre todo, lo que hace a la inserción de Argentina en el mundo. Es por ello que, si buscamos una inserción seria, estable y duradera en el tiempo, antes de analizar competencias específicas debemos definir qué queremos hacer, cómo, dónde y cuándo.

### **Región de Esequibo que le disputa Venezuela a Guyana**

Los conflictos violentos y las tensiones fronterizas parecían propias de África, de Asia, de Europa (Ucrania-Rusia) o, más recientemente, Medio Oriente, hasta que la alarma se encendió en la región del Esequibo, cuya soberanía se disputan Venezuela y Guyana. El litigio se recalentó a finales de 2023, cuando Venezuela movilizó tropas, Estados Unidos irrumpió con despliegue militar en resguardo de Guyana y la respiración se cortó en la región durante algunos días de diciembre, hasta que los presidentes Nicolás Maduro e Irfaan Ali se reunieron en San Vicente y las Granadinas.

Inserción de la Argentina en el mundo

### **Geopolítica de los alimentos: ocho vectores que afectan a la Argentina**

El artículo examina la intersección entre la geopolítica y la seguridad alimentaria con un enfoque particular en Argentina, un país conocido como el "granero del mundo". A lo largo de la historia, la producción y la distribución de alimentos han sido fundamentales para la estabilidad social y política de las naciones. En este sentido, se analizan los desafíos actuales que enfrenta Argentina, que incluyen la concentración del mercado agroindustrial, el impacto de las grandes corporaciones en la formación de precios y la adopción de tecnologías agrícolas. Además, se discute la creciente preocupación global por la seguridad alimentaria, especialmente en el contexto de las disruptivas causadas por la pandemia de COVID-19 y por los conflictos internacionales.
